Education

University of California – San Diego

B.S. Mathematics–Computer Science
Minor in Cognitive Science (Machine Learning)

Graduation 2029

GPA: 4.0

Professional Experience

Sprout Media

Data & Machine Learning Analyst

Remote

2026 – Present

- Analyzed performance of Meta Ads campaigns using Python (pandas, NumPy) and Excel, evaluating full-funnel metrics (CTR, CPC, CPA, ROAS).
- Built predictive LLM models to forecast campaign success using feature analysis across creatives, audience, and spend data.
- Delivered client-facing strategy presentations with insights on performance, optimization, and budget allocation.

UCSD Institute of Engineering in Medicine

Lead Research Intern

San Diego, CA

2024 – 2025

- Led a 5-person team analyzing 500+ DRG neuron microscopy images using Python, MATLAB, and ImageJ to extract morphological and intensity features.
- Authored and presented technical analyses contributing to 2 peer-reviewed abstracts at the Biomedical Engineering Society (BMES).

Open Coding Society

Project Manager and Developer

San Diego, CA

Nov 2024 – Jun 2025

- Led Agile development of a district-wide collaborative learning platform with live review recording and AI-powered homework support, deployed across 6 high schools in the CTE department.
- Built full-stack features using Spring Boot, SQL, REST APIs, and JavaScript, managing Git/GitHub workflows and coordinating cross-campus requirements.

Mathnasium

Lead Math Instructor

San Diego, CA

2023 – 2025

- Taught 4–5 students per session (K–12 through Calculus) using individualized instruction to strengthen problem-solving and core math skills.

Projects

Spotify Visual Art Generator

Jan 2026 – Present

- Built a Python ML pipeline using NumPy, pandas, and scikit-learn analyzing 1,000+ Spotify audio features to classify playlist vibe and generate visual art.
- Integrated the Spotify API with Flask and a JavaScript frontend to create real-time visualizations.

California Real Estate Intelligence Tracker

Oct 2025 – Nov 2025

- Developed a full-stack Python/Flask platform aggregating 5,000+ Zillow listings using Google Maps API.
- Built an indexed SQL database enabling interactive filtering by price, ROI, and location.

Technical Skills

Programming: Python, Java, SQL, C

Machine Learning: NumPy, pandas, scikit-learn

Visualization: Plotly, Tableau

Backend: Spring Boot, REST APIs, MySQL, PostgreSQL

Tools: Git, Linux, Jupyter Notebooks
